MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis ("MD&A") reports on the consolidated financial condition and operating results of The Green Organic Dutchman Holdings Ltd. (the "Company" or "TGODH") for the three and six months ended June 30, 2019 and 2018. The MD&A should be read in conjunction with the Company's unaudited interim condensed consolidated financial statements for the three months and six months ended June 30, 2019 and June 30, 2018 (the "interim consolidated financial statements") which were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). This MD&A provides information on the operating activities, performance and financial position of the Company and is intended to assist in understanding of the Company's business and key factors underlying its financial results. **All dollar amounts referred to in this MD&A are expressed in thousands of Canadian dollars except where indicated otherwise.**

Additional information relating to the Company can be found on the Company's website at www.tgod.ca or at the Company's SEDAR profile at www.sedar.com.

FORWARD LOOKING INFORMATION

This MD&A may contain "forward-looking information" within the meaning of Canadian securities legislation ("forward-looking statements"). These forward-looking statements are made as of the date of this MD&A and the Company does not intend, and does not assume any obligation, to update these forward-looking statements, except as required under applicable securities laws. Forward-looking statements relate to future events or future performance and reflect Company management's expectations or beliefs regarding future events.

In some cases, these forward-looking statements can be identified by words or phrases such as "may", "might", "will", "expect", "anticipate", "estimate", "intend", "plan", "indicate", "seek", "believe", "predict" or "likely", or the negative of these terms, or other similar expressions intended to identify forward-looking statements. The Company has based these forward-looking statements on its current expectations and projections about future events and financial trends that it believes might affect its financial condition, results of operations, business strategy and financial needs. Some examples of forward-looking statements include but are not limited to the expected costs, completion dates of the facilities, production capacity, receipt of licences, etc.

Assumptions

Forward-looking statements are based on certain assumptions and analyses made by the Company in light of the experience and perception of historical trends, current conditions and expected future developments and other factors it believes are appropriate and are subject to risks and uncertainties. In making the forward-looking statements included in this MD&A, the Company has made various material assumptions, including but not limited to:

- (i) general business and economic conditions;
- (ii) the Company's ability to successfully execute its plans and intentions;
- (iii) the completion of the construction of its facilities in Hamilton and Québec.
- (iv) obtaining the necessary regulatory approvals;
- (v) that regulatory requirements may or may not adversely affect the business;
- (vi) the availability of financing on reasonable terms;
- (vii) the Company's ability to attract and retain skilled staff;
- (viii) market competition and product demand;
- (ix) the products and technology offered by the Company's or its competitors; and
- (x) that our current good relationships with our suppliers, service providers and other third parties will be maintained.

Although we believe that the assumptions underlying these statements are reasonable, they may prove to be incorrect, and we cannot assure that actual results will be consistent with these forward-looking statements.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There is no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. We do not undertake to update or revise any forward-looking statements, except as, and to the extent required by, applicable securities laws in Canada.

The Company's forward-looking statements are based on the reasonable beliefs, expectations and opinions of management as of August 13, 2019, the date of this MD&A.

BUSINESS OVERVIEW

The Green Organic Dutchman Holdings Ltd. is a company built on innovation with the goal of becoming the global leader in delivering premium organic cannabis and hemp solutions to enhance people's lives. The Company is committed to building the largest premium organic cannabis and organic hemp brand in the world, with organic certification, LEED certified construction and GMP compliant facilities. The Company is incorporated under the federal laws of Canada pursuant to the *Canada Business Corporations Act* and is a reporting issuer in each of the provinces of Canada. The Company's common shares (the "Common Shares") are traded on the Toronto Stock Exchange ("TSX") under the symbol "TGOD" and on the OTCQX under the symbol "TGODF".

Through its wholly-owned operating subsidiaries The Green Organic Dutchman Ltd. ("TGOD") and Medican Organic Inc. ("Medican"), the Company holds licences issued by Health Canada pursuant to the *Cannabis Act* (Canada) ("Cannabis Act") which allows the Company to perform research and development, produce, and sell cannabis in Canada. The Company is currently constructing facilities in Hamilton Ontario in addition to the existing 7,000 sq. ft. facility that will bring the total facilities' square footage on the site to 166,000 sq. ft. capable of producing up to 17,500 kilograms ("kg") of premium organic cannabis per year (the "Hamilton Facility"). Through the Company's 49.99% interest in 9371-8633 Québec Inc. ("Québec SubCo"), the Company acquired an interest in certain lands located in Sallaberry-de-Valleyfield, Québec ("the "Valleyfield Land") that it is developing into its flagship production facility (the "Québec Facility"). The Québec Facility is expected to be 1,310,000 square feet capable of producing up to 185,000 kilograms annually when completed.

In addition, the Company has embarked on international ventures to further its footprint in the Cannabis industry. The Company holds a 49.18% interest in Epican Medicinals Ltd. ("Epican"), a licenced producer in Jamaica which holds a cultivator's licence, processing licence and two retail (Herb Houses) licences issued by the Cannabis Licensing Authority ("CLA") of Jamaica. In Denmark, TGOD Denmark A/S ("TGOD Denmark") was incorporated and is owned 50% by TGODH and 50% by Knud Jepsen, a leading horticulture producer in Europe, and is licenced by the Danish Medicinal Authority to allow for the importation of starting materials and to begin research and development related to the creation of cannabis genetics. Based on the genetics research, joint venture production companies operated in conjunction with Knud Jepsen are expected to be formed and operated in lower cost jurisdictions in Europe to the extent that local laws allow such production. The Company, through various wholly owned subsidiaries and subsidiaries that it controls, also has an exploratory presence in Mexico, Germany, and Greece.

HemPoland sp. z o.o. ("HemPoland") is a hemp extraction and manufacturing business based in Poland which was acquired by the Company on October 1, 2018. HemPoland is a manufacturer and marketer of premium CBD oils. This acquisition provided access to HemPoland's significant distribution network, state-of-the-art hemp oil extraction technology and its premium CannabiGold brand. On June 20, 2019, the Company launched its global strategic hemp division to serve the global hemp CBD market, with hemp operations based in Ontario.

Since inception, the Company has incurred recurring operating losses, having invested significantly in its cultivation facilities, research and development activities and selling, marketing, general and administrative expenses. The Company has financed its operations through equity raises including the issuance of Common Shares and warrants through various private placements, its initial public offering and through a special warrant financing (see "Developments in 2019"). The Company expects to continue to incur losses in the short term and may require additional capital to fulfill its future obligations. Please refer to the section on "Liquidity and Capital Resources" below. The Company believes that its unique scaled certified organic market position, the ongoing advancement of the construction of its facilities, and its strategic partnerships and investments will allow it to operate profitably in the future.

DEVELOPMENTS IN 2019

On January 3, 2019, the Company entered into an agreement to use EnWave Corporation's ("EnWave") proprietary Radiant Energy Vacuum ("REV™") dehydration technology to dry organic cannabis in Canada. On March 26, 2019, the Company purchased an additional three REV™ processing lines to expand its drying capacity of premium, certified organic cannabis in Canada. The addition of three 120kW REV™ machines will increase its total royalty-bearing cannabis processing capacity to a combined total of 420kW of REV™ machinery.

On January 8, 2019, the Company appointed Dr. Caroline MacCallum and Mr. Jacques Dessureault to the Board of Directors. On the same date, Mr. Ian Wilms stepped down from the Board and assumed the role of VP, Government Affairs and Social Responsibility.

On January 17, 2019, the Company appointed Dr. Ravinder Kumar, PhD, as Chief Science Officer.

On January 25, 2019, the Company entered into a definitive agreement with Knud Jepsen ("KJ Definitive Agreement") to establish a joint venture; for the purpose of producing commercial cannabis and cannabis oils (the "Production JV") and for developing and patenting cannabis genetics (the "Genetics JV"). The Genetics JV, which was incorporated on March 18, 2019, and the initial Production JV will be based in Denmark with a goal to expand further Production JVs into future lower-cost European jurisdictions. The KJ Definitive Agreement outlines the Company's and Knud Jepsen's launch of a premium

organic European bulk cannabinoid production platform where TGODH will have the exclusive right to all cannabis-related production, through a guaranteed offtake agreement at a pre-determined price relative to production cost. Further, the Production JVs will have exclusive access to all intellectual property, including cannabis genetics developed within the Genetics JV. Knud Jepsen is responsible for the day-to-day operations of the joint venture and TGODH will leverage Knud Jepsen's years of horticulture experience, and its science and R&D division, to accelerate commercial operations in Denmark and throughout Europe. On November 22, 2018, the Danish Medicines Agency, the government body responsible for issuing cannabis related licences, granted an initial cannabis business authorization to Knud Jepsen, which license was transferred to the Genetics JV on April 5, 2019, with the approval of the Danish Medicines Agency. This licence allows the Genetics JV to import starting materials and to begin research and development related to the creation of cannabis genetics.

On July 19, 2018, the Company announced its intention to complete a spinoff transaction whereby the Company would spinoff, by way of special dividend under a plan of arrangement (the "Arrangement"), TGOD Acquisition Corporation ("SpinCo"), a company that will focus on international acquisitions that are not core to the Company's business. Shareholders approved the spinoff at the Company's December 6, 2018 annual general and special meeting and the Company received the final order in respect of the spinoff from the Ontario Superior Court of Justice on January 16, 2019. Each shareholder of the Company as of the record date of January 31, 2019 who was a non-US resident and elected to receive unit purchase warrants received 0.15 of one-unit purchase warrant of SpinCo for every one common share held in the Company. Each unit purchase warrant entitled the holder to purchase one unit of SpinCo upon (i) the holder tendering the exercise price of \$0.50 per SpinCo unit (not in thousands) to Spin Co within 30 days following the effective date of the plan of arrangement implementing the spinoff and (ii) SpinCo obtaining a receipt for a final prospectus qualifying the distribution of the SpinCo Units within 60 days of such date, failing which the exercise proceeds will be returned to exercising warrant holders. Each unit of SpinCo consisted of one SpinCo common share and one half of one SpinCo common share purchase warrant. Each SpinCo common share purchase warrant is exercisable to purchase a SpinCo common share for an exercise price of \$1.25 (not in thousands) at any time until the date that is 24 months from the date the SpinCo common shares commence trading on a recognized securities exchange. On January 28, 2019, the Company's wholly owned subsidiary SpinCo shares were transferred to a third-party company pursuant to the terms of the Arrangement. A copy of the Circular and related meeting materials, the Arrangement Agreement and the Amending Agreement are available under TGOD's profile on SEDAR at www.sedar.com. On June 3, 2019, the SpinCo Unit Warrants of SpinCo were distributed to all registered shareholders of record of the Company as of January 31, 2019 who elected to receive the SpinCo Unit Warrants.

On February 1, 2019, the Company provided construction and capacity updates to the Company's facilities located in Hamilton and Valleyfield which was further updated on March 19, 2019. See "Update on Hamilton Facility and Québec Facility Milestones".

On February 8, 2019, the Company announced that it has secured a cannabis supply agreement with the Ontario Cannabis Retail Corporation. The agreement was negotiated jointly by the Company and Velvet Management Inc., the Company's Canadian distribution partner.

On March 5, 2019, the Company announced that it has received organic certification from Pro-Cert Organic Systems Ltd. ("Pro-Cert"). This is the second certification body to endorse the Company's organic processes at its Hamilton Facility. On June 27, 2019, the Company's Quebec Facility also obtained organic certification from Pro-Cert.

On March 11, 2019, the Company announced that it has entered into a multi-year extraction services contract with Valens GroWorks Corp. ("Valens"). Pursuant to the terms of the initial 2-year agreement, Valens will process, extract and purify TGOD's cannabis and hemp biomass under conditions specified by TGODH as demanded by final product manufacturing and formulation requirements. TGODH will supply Valens with significant quantities of cannabis and hemp and Valens will provide extraction purification services processing the cannabis and hemp into premium quality resins and distillates. TGODH intends to use the concentrated cannabinoid resins and distillates to produce oils, sprays and capsules as well as oils for vaporization and future edible, beverage and topical products.

On March 28, 2019, the Company announced that Hamilton City Council had voted to approve the Company's settlement offer, to allow TGOD to operate its cannabis greenhouse in Hamilton, Ontario upon confirmation of the settlement by the Local Planning Appeal Tribunal ("LPAT"). On May 2, 2019, the LPAT approved the settlement agreement paving the way to the completion of the construction project and production at scale.

On April 22, 2019, the Company received its oil sales licence from Health Canada, pursuant to the Cannabis Act, for its Hamilton, Ontario facility.

On April 26, 2019, HemPoland received organic certification from EKOGRWARANCJA PTRE. The organic certification was provided by the Polish Center for Accreditation on authority from the Minister of Agriculture and Rural Development. HemPoland's facilities, production processes and product offerings are certified organic.

On April 30, 2019, Valens, obtained its organic certification from Pro-Cert.

On May 1, 2019, the Company's strategic partner in Jamaica, Epican, announced the receipt of its second retail licence and the opening of its second legal cannabis retail store in Jamaica, located on Montego Bay's "Hip Strip". Montego Bay is a popular tourist destination and Jamaica's second largest city. The Montego Bay dispensary, located on the main tourist shopping strip, is the second Epican dispensary to open, after Epican's Herb House in Kingston which opened in June 2018. Epican is the first fully integrated company to have obtained a second retail licence from Jamaica's Cannabis Licensing Authority (CLA). Epican plans to open three additional Herb Houses on the island. In combination with online ordering, these locations will serve the medical needs of Jamaica's estimated three million residents and three and a half million annual visitors.

On May 8, 2019, the Company announced its strategic investment into the US beverage space as a co-founding investor and strategic partner in the newly formed Califormulations LLC ("Califormulations"). Califormulations will operate out of Columbus, Georgia serving global branded companies with concept-to-shelf beverage commercialization support including formulation development, technical services, in-house pilot scale production and contract manufacturing co-ordination. The Company expects to leverage experience within Califormulations to expedite the US launch of TGOD branded organic hemp-based CBD beverages, as local laws and regulations permit. The Company's co-founding investment is occurring alongside Symrise AG ("Symrise"), one of the world's leading flavour, scent and nutrition ingredient providers.

On May 9, 2019, the Company secured a cannabis supply agreement with the BC Liquor Distribution Branch ("BCLDB"). The BCLDB, under the brand BC Cannabis Stores, is British Columbia's public retailer of non-medical cannabis.

On May 13, 2019, the Company announced that it had entered into an agreement with Mediakos UG haftungsbeschraenkt ("Mediakos") to be the exclusive distributor of CannabiGold, its premium hemp CBD brand, for the German pharmacy market.

On May 14, 2019, the Company obtained approval from Health Canada, under the Cannabis Regulations, to expand operations into its new state-of-the-art building located in Hamilton, Ontario. The 20,000 square feet indoor facility is going to be used for cannabis cultivation; planting will start in the coming weeks.

On May 24, 2019, the Company secured a cannabis supply agreement with Alberta Gaming, Liquor & Cannabis ("AGLC") further expanding its footprint in Western Canada. AGLC, under the brand Alberta Cannabis, is Alberta's legal, non-medical online cannabis store.

On June 12, 2019, the Company entered into a multi-year agreement with Neptune Wellness Solutions ("Neptune") for extraction, formulation and packaging services. As part of the agreement, the Company will have exclusivity on extraction, formulation and packaging of certified organic products within and for the Canadian market. Neptune's expertise will enable the Company to quickly scale up production of a wide range of consumer wellness products. Under the terms of the agreement, the Company can allocate more than 230,000 kilograms of cannabis and hemp biomass for Neptune to process and transform into premium certified organic consumer wellness products, making this the largest deal for a processor in the industry to date. The contract between the Company and Neptune covers a period of three years and is expected to be back-end loaded with the first-year accounting for approximately 20% of the total value.

SUBSEQUENT EVENTS

On August 2, 2019 the Company announced that it has successfully renewed its Health Canada licence for the Company's Hamilton, Ontario facility until August 2022.

On August 7, 2018, the Company announced that it has submitted an application to list its common shares on the NASDAQ Capital Market.

On August 9, 2019, the Company cancelled its unused line of credit with the Credit Union, see "Liquidity and Capital Resources".

OVERALL PERFORMANCE

SELECTED YEAR TO DATE INFORMATION

The table below summarizes selected information regarding the Company's financial position and operations for the periods presented in accordance with IFRS and on a consistent basis with the interim consolidated financial statements and related notes:

	As at June 30, 2019	As at January 1, 2019*	As at December 31, 2017
Total assets	\$ 436,257	\$ 447,236	\$ 96,977

Comprehensive loss	\$ (32,747)	(15,814)
Net loss per share (basic & diluted)	\$ (0.11)	(0.09)

SUMMARY OF YEAR TO DATE ("YTD") RESULTS – YTD-2019 as compared to YTD-2018

Revenues

The Company's revenues in the quarter were substantially comprised of sales of hemp-based products through its wholly owned subsidiary, HemPoland. Revenue recognized for the six months ended June 30, 2019 amounted to of \$5,301.

In Canada, no significant revenues were earned by the Company for the six months ended June 30, 2018 as the Company continued to build out its facilities. The Company launched its pilot "Grower's Circle", which included sales to a small number of medical patients to test the market and the Company's distribution capabilities. This strategic initiative enabled the Company to ensure it is in a position to provide customers and patients with consistent, reliable and high-quality product all whilst focusing on operational readiness at the Hamilton and Québec locations. Therefore, the Company recorded immaterial revenues from Canada in the period given the limited scope of the pilot and focused on delivering national sales in the medical and some recreational markets later in 2019 using the knowledge gained from the pilot program.

Gross profit

The Company's gross profit for the six months ended June 30, 2019 was \$3,324 mainly as a result of revenue from HemPoland and gains on changes in the fair value of the Company's biological assets located in Canada of \$225, neither of which existed in the prior year comparative period. The Company did not record gross profit in the six months ended June 30, 2018.

Marketing expenses

With the assistance of its strategic partner, Velvet Management, TGOD has successfully signed the largest Cannabis boards across Canada to supply agreements to fulfill in the later portion of 2019. Marketing expenses of \$6,926 for the six months ended June 30, 2019 were \$5,436 higher than expenses of \$1,490 for the six months ended June 30, 2018. Marketing expenses consisted of personnel costs of \$1,187 in comparison to \$212 for the corresponding period in the prior year, costs of promoting the Company's brand and consumer market research of \$3,848 in comparison to \$1,031 for the corresponding period in the prior year, travel and other promotional expenditures of \$453 in comparison to \$247 for the corresponding period in the prior year and strategic partnerships payments of \$1,409 whereas no similar strategic payments were made

in the comparative period for the prior year. In addition, sales and marketing efforts in Europe proved to have a positive impact on sales.

Research and development expenses

Research and development ("R&D") expenses of \$1,022 for the six months ended June 30, 2019 were \$554 lower than expenses of \$1,576 for the corresponding period in 2018. R&D expenses decreased year over year as a result of the earlier research at the existing 7,000 sq. ft. facility to ensure operational readiness. For the six months ended June 30, 2019, the Company's R&D initiatives were led by Chief Science Officer Rav Kumar, Ph.D., in building out his team to explore the efficacy of organic products and new product lines such as topicals, beverages and edibles.

R&D expenses for the six months ended June 30, 2019 consisted of personnel costs of \$440 in comparison to \$949 for the six months ended June 30, 2018, product development costs of \$412 in comparison to \$326 for the six months ended June 30, 2018, travel related expenses of \$44 in comparison to \$172 for the six months ended June 30, 2018, and other R&D expenses of \$126 in comparison to \$129 for the six months ended June 30, 2018.

General and administrative expenses

General and administrative expenses of \$17,366 for the six months ended June 30, 2019 were \$8,144 higher than expenses of \$9,222 for the corresponding period in 2018. Personnel costs increased by \$3,018 to \$5,644 for the six months ended June 30, 2019 from \$2,626 for the comparative period as a result of expanding operations and increased headcount. For the six months ended June 30, 2019, professional and legal fees increased by \$2,290 to \$3,771 from \$1,481 for the six months ended June 30, 2018 primarily due to professional services related to international expansion. Consulting fees increased by \$23 to \$1,750 from \$1,727. Furthermore, travel increased by \$783 from \$312 and other administrative expenses increased by \$227 from \$3,076 as a result of hiring seasoned executives to execute the Company's strategic objectives.

Non-cash stock-based compensation expenses

Non-cash stock-based compensation expense of \$7,852 for the six months ended June 30, 2019 were \$3,927 higher than expense of \$3,925 for the corresponding period in 2018 due primarily to grants to new hires.

Loss from operations

Losses from operations of \$31,141 for the six months ended June 30, 2019 were \$14,608 higher than losses from operations of \$16,533 for the six months ended June 30, 2018, primarily as a result of increased expenses as outlined above, related to significant changes and evolution of the business from its first days of operation to becoming a global premium organic cannabis producer.

Net loss

The Company's net loss for the six months ended June 30, 2019 of \$30,694 (six months ended June 30, 2018 - \$15,814) is comprised of the loss from operations discussed above primarily offset by finance income of \$2,055 in comparison to \$767 in the same period for the prior year due to earning more interest income on significantly more capital being managed in top tier Canadian financial institutions.

Comprehensive loss

The Company's comprehensive loss for the six months ended June 30, 2019 is \$32,747 (six months ended June 30, 2018 - \$15,814) and is comprised of the net loss discussed above and the losses incurred through other comprehensive income due to foreign exchange translation losses from foreign operations of \$2,053. The Company's comprehensive loss in the prior year consistent of its net loss as no accounting treatments that would have given rise to other comprehensive losses or income existed.

SELECTED QUARTERLY TO DATE INFORMATION

The table below summarizes selected information regarding the Company's loss from operations and other financial information for the periods presented in accordance with IFRS and on a consistent basis with the interim consolidated financial statements and related notes:

	Q2-2019	Q1-2019	Q4-2018	Q3-2018	Q2-2018	Q1-2018	Q4-2017	Restated Q3-2017

Comprehensive loss	\$ (17,306)	(15,441)	(17,607)	(11,269)	(8,548)	(7,266)	(6,282)	(2,400)
Net loss per share (basic & diluted)	\$ (0.06)	(0.05)	(0.07)	(0.04)	(0.04)	(0.05)	(0.05)	(0.02)

SUMMARY OF QUARTERLY RESULTS – Q2-2019 as compared to Q2-2018 and Q1-2019

Revenues

The Company's revenues in the quarter were substantially all comprised of sales of hemp-based products through its wholly owned subsidiary, HemPoland which was acquired on October 1, 2018. Revenue recognized in Q2-2019 amounted to \$2,896. In comparison to Q1-2019 revenue of \$2,406, revenue increased by \$490 or 20% quarter over quarter due to increased demand for CBD based oil products.

In Canada, no significant revenues were earned by the Company for the six months ended June 30, 2018 as the Company continued to build out its facilities. The Company launched its pilot "Grower's Circle", which included sales to a small number of medical patients to test the market and the Company's distribution capabilities. This strategic initiative enabled the Company to ensure it is in a position to provide customers and patients with consistent, reliable and high-quality product all whilst focusing on operational readiness at the Hamilton and Québec locations. Therefore, the Company recorded immaterial revenues from Canada in the period given the limited scope of the pilot and focused on delivering national sales in the medical and some recreational markets later in 2019 using the knowledge gained from the pilot program.

Gross profit

The Company's gross profit for the three months ended June 30, 2019 was \$1,957 mainly as a result of increased revenue from HemPoland. This revenue increase versus Q2-2018 is partially offset by inventory production costs of \$944. In comparison to Q1-2019, gross profit increased by \$589 as a result of higher volume sales of products with lower margins and lower expensing of inventory fair value adjustments from the HemPoland transaction through cost of sales.

Sales and marketing expenses

Sales and marketing expenses of \$3,930 for the three-months ended June 30, 2019 were higher than the \$662 for the same period in the prior year due to the ramp-up in operations and preparation for product launches later in 2019. The expenses in the current quarter compared to the three months ended June 30, 2018, respectively consisted of personnel costs of \$768 compared to \$177, costs of promoting the Company's brand and consumer market research of \$2,305 compared to \$446, travel and promotional expenditures of \$336 compared to \$39, and strategic partnership payments of \$504 in the current year, compared to \$nil in the prior year. The strategic partnership payments were incurred to establish the primary sales channels for sales in the adult use market. In addition, sales and marketing efforts in Europe proved to have a positive impact on sales.

In comparison to Q1-2019, sales and marketing expenses increased in Q2-2019 by \$935 primarily due to significant investments made in packaging, branding and media leading up to the planned launch of new TGO products in the second half of 2019. Marketing expenses in Q1-2019 consisted of personnel costs of \$419, costs of promoting the Company's brand at investor conferences of \$1,543, travel and promotional expenditures of \$117, strategic partnership payments of \$905, and other marketing expenses of \$11.

Research and development expenses

Research and development expenses decreased from Q1-2018, as in the prior year, the Company had a significant amount of resources performing research and development activities to ready the facilities for production. Chief Science Officer Ravinder Kumar, Ph.D. shifted the focus of the Company's activities to commercialize innovative solutions to the topicals, drinks and edibles market expected to be legalized in Canada later in 2019. Research and development expenses of \$586 for the three months ended June 30, 2019 represented a decrease of \$475 from the comparative period in 2018 and consisted of personnel costs of \$305 compared to \$576, product development costs of \$196 compared to \$217, respectively travel and promotional expenditures of \$21 compared to \$170, and other research related expenses of \$64 compared to \$98.

Research and development costs in Q1-2019 were \$436 which consisted of personnel costs of \$135, product development costs of \$216, travel and promotional expenditures of \$23 and other research related expenses of \$62 which were all a function of the Chief Science Officer's initiatives described above.

General and administrative expenses

General and administrative expenses of \$8,687 for the three months ended June 30, 2019 were \$3,270 higher than expenses of \$5,417 for the same period in the prior year, as a result of the expansion of the business as it moves towards commercial production. Included in general and administrative expenses in the current quarter compared to the three months ended June 30, 2018, respectively are personnel costs of \$3,124 in comparison to \$1,814, consulting fees of \$864 compared to \$508, professional and legal fees of \$1,662 compared to \$787, occupancy costs of \$225 compared to \$115, travel and promotion expenses of \$496 compared to \$300, and other administrative expenses of \$739 in comparison to \$1,893. The remaining \$1,577 of expenses in the current quarter included investor relations expenses, taxes, licences and listing expenses, computer and IT expenses, insurance expense, recruiting fees, office and administrative expenses and directors' fees, which were not significant in the three months ended June 30, 2018.

In comparison to Q1-2019, general and administrative expenses increased by \$5. Consulting, professional and legal fees decreased due to the investments made towards operational readiness activities such as hiring and preparing the supply chain and assistance from third party vendors being primarily made in Q1-2019. In Q2-2019, management made conscious efforts to control general and administrative costs ahead of the launch of the Grower's Circle and with plans to hire at a steady pace and to limit the use of external consultants in Canada. Professional and legal fees are expected to increase in future quarters as the Company continues to operate in ever changing and evolving international markets to remain competitive. Management views the monitoring of international regulatory environments as critical to the business' international success.

Non-cash stock-based compensation expenses

Non-cash stock-based compensation increased by \$2,682 to \$4,433 for Q2-2019 from \$1,751 in Q2-2018, which is a result of the Company issuing more non-cash stock-based compensation to provide equity incentives to management and employees to incentivize stakeholder returns and have an interest in the growth of the Company. In comparison to Q1-2019, the Company experienced an increase of \$1,014 due to newly hired employees being granted share-based compensation upon commencing their employment as operations continued to grow.

Loss from operations

Losses from operations of \$16,417 for the three months ended June 30, 2019 were higher than losses from operations of \$9,072 for the three months ended June 30, 2018, primarily as a result of increased expenses as outlined above, related to significant changes and evolution of the business from its pre-initial public offering stage to becoming a global premium organic cannabis and hemp producer.

In comparison to a loss from operations of \$14,725 in Q1-2019, the Company's losses from operations were higher with the increased loss primarily due to an increase in marketing initiatives and increased stock-based compensation in Q2-2019. It is largely comprised of an increase in sales and marketing expenses of \$935, an increase in stock-based compensation of \$1,014, an increase in depreciation and amortization of \$177, an increase in R&D spend of \$150, and an increase in general and administrative spend of \$5, partially offset by an increase in revenues of \$490 which arose from HemPoland.

Net loss

The Company's net loss for the three months ended June 30, 2019 is \$16,603 (Q2-2018 – \$8,548) is comprised of the loss from operations discussed above primarily offset by finance income of \$869 in comparison to \$572 in the same period for the prior year due to significantly more capital being managed in top tier Canadian financial institutions.

In comparison to Q1-2019, the Company experienced a \$317 decrease in finance income due to decreases in cash held as term deposits during the quarter.

Comprehensive loss

The Company's comprehensive loss for the three months ended June 30, 2019 is \$17,306 (Q2-2018 – \$8,548) and is comprised of the net loss discussed above and the losses incurred through other comprehensive income due to foreign exchange translation losses from foreign operations of \$703. The Company did not have other comprehensive loss or income for the same period in the prior year.

In comparison to Q1-2019, the Company's other comprehensive loss decreased by \$647 due to fluctuation in exchange rates where the functional currency of a foreign operation differed from that of the reporting entity, The Green Organic Dutchman Holdings Ltd.

FINANCIAL POSITION

The following is a discussion of the changes to the Company's financial position as at June 30, 2019 as compared to January 1, 2019 in accordance with IFRS and on a consistent basis with the interim consolidated financial statements and related notes:

in thousands of \$CAD, except %	As at June 30, 2019	As at January 1, 2019	Change (\$)	Change (%)	Comments
ASSETS					
Current assets					
Cash and cash equivalents	\$ 68,715	\$ 213,549	(144,834)	(68)	See Liquidity and Capital Resources section below.

Total Liabilities and Shareholders' Equity	\$ 436,257	\$ 447,236	(10,979)	(2)	

LIQUIDITY AND CAPITAL RESOURCES

During the six months ended June 30, 2019, the Company generated substantially all of its revenue from foreign operations and relied on the equity financing raise in prior years to finance its operations and meet its capital requirements. The Company's objectives when managing its liquidity and capital resources are to maintain a sufficient capital base to maintain investor and creditor confidence and to sustain the future development of the business.

Working capital as of June 30, 2019 was \$118,900 (December 31, 2018 - \$257,707). Total cash position was \$122,715 including \$54,000 of restricted cash (December 31, 2018 - \$263,549 of which \$50,000 was restricted cash) held in escrow for construction contracts. This cash, together with normal course bank facilities and equipment leasing, will be used towards the construction of facilities in 2019, to install manufacturing equipment and cover operating costs until the Company has positive operating cashflow, which is expected by the first half of 2020. The Company is currently in discussions with a chartered Canadian bank to establish an operating loan secured on the Hamilton and Valleyfield facilities.

	For the three months ended		For the six months ended

(Decrease) increase in cash and cash equivalents	\$ (105,713)	187,154	\$ (144,834)	198,080

Operating Activities

For the six months ended June 30, 2019 net cash used in operating activities was \$25,880 higher than the six months ended June 30, 2018. The increase was primarily related to an increase of \$14,880 in net losses from operational expenditures as discussed above and an increase in non-cash operating working capital items of \$16,287.

For the three months ended June 30, 2019 net cash used in operating activities was \$9,333 higher than the three months ended June 30, 2018, also due to an increase of \$8,055 in net losses and an increase in non-cash operating working capital items of \$4,800.

Investing Activities

For the six months ended June 30, 2019 net cash used in investing activities was \$91,678 higher than the six months ended June 30, 2018. The increase was primarily the result of a \$86,745 increase in additions to property, plant and equipment as a result of a ramp up of construction projects.

For the three months ended June 30, 2019 net cash used in investing activities was \$70,363 higher than the three months ended June 30, 2018. The increase was primarily the result of a \$64,172 increase in additions to property, plant and equipment as a result of a ramp up of construction projects.

Financing Activities

For the six months ended June 30, 2019 net cash provided by financing activities was \$224,432 lower than the six months ended June 30, 2018. The decrease was primarily the result of the Company's IPO which took place in Q2-2018. Proceeds from the issuance of shares and warrants, net of share issue costs was \$226,539 higher in the six months ended June 30, 2018.

For the three months ended June 30, 2019 net cash used in financing activities was \$212,759 lower than the three months ended June 30, 2018. The decrease was primarily the result of the Company's IPO which took place in Q2-2018. Proceeds from the issuance of shares and warrants, net of share issue costs was \$204,693 higher in the three months ended June 30, 2018.

Short-term Loans

On September 1, 2017, the Company executed a revolving credit agreement with a Canadian credit union entitling the Company to borrow to a maximum limit of \$5,000, subject to certain reporting requirements. The credit facility is secured by a GIC and bears a conventional rate of interest. As at June 30, 2019, the Company has not drawn under the revolver loan and is in compliance with the reporting requirements. On October 1, 2018, as part of the HemPoland transaction, the Company acquired HemPoland's operating line of credit of which the entire outstanding amount drawn upon of \$146 (400,000 PLN) was repaid as at March 31, 2019. Also, as part of the HemPoland transaction, the Company assumed HemPoland's short-term loan payable on certain premises in Poland, of which \$532 remained outstanding as at June 30, 2019 (December 31, 2018 - \$542).

Contractual Lease Commitments

The Company has entered into contracts at multiple locations, whereby it was committed to make future payments. Management has reviewed these contracts and determined that they qualify for the recognition exemptions as prescribed by IFRS 16. The total future minimum annual contractually committed payments, other than those already captured under IFRS 16, are \$46. The lease for the office space of the Company's headquarters required the issuance of a letter of credit in the amount \$350, which may be drawn upon by the landlord in the event of a material breach of the agreement. As at June 30, 2019, there have been no breaches and no amounts have been drawn upon this letter of credit.

Construction Agreements

The Company has entered into contracts for the construction of its facilities in Hamilton, Ontario and Salaberry-de-Valleyfield, Québec with various vendors. Pursuant to some of these agreements, the Company has issued letters of credit in the amount of \$5,003 which may be drawn upon in the event of material breaches of the respective agreements. These letters of credit bear conventional rates of interest partially offset by the interest earned on guaranteed investment certificates ("GIC") securing the letters as collateral. The Company has pledged \$5,000 of GICs as collateral, which has been recorded in other assets due to the long-term nature of the related project. As at June 30, 2019, there have been no breaches and no amounts have been drawn on the letters of credit. As at June 30, 2019, the Company has outstanding deposits on construction related activities of \$29,191 (December 31, 2018 – \$9,431). The Company has also entered into an escrow agreement with its construction partner in Québec whereby \$50,000 has been allocated to the Québec project and these funds are included in restricted cash. During the three months ended June 30, 2019, the Company entered into a similar arrangement with its construction partner in Hamilton for \$4,000 which was also included in restricted cash.

Update on Hamilton Facility and Québec Facility Milestones

The Company continued to make significant progress at both facility locations. At the Hamilton Facility, several major achievements were made which include the completion of the installation of the underground heating, cooling, rain water, irrigation, sewer and natural gas systems, installation of the hot water and cold water tanks, mechanical completion of the greenhouse air handling and environmental control systems, installation and commissioning of the greenhouse security system and the continuation of pre-verification operational tests and associated commissioning on the early start up systems. The installation of the lighting and table systems in the greenhouse have significantly progressed throughout the quarter with anticipation of being fully completed in August. Several grow rooms were also transferred to operations in the quarter to allow the operating team to commence the facilities ramp up plan. At the Valleyfield facility, significant progress was also made, notably concrete floors installation continued with 75% of the main greenhouse being completed, the completion of the main transformer station including the placement and connection of the electrical house was achieved, with substantial completion of the installation of the underground heating and cooling piping systems for the greenhouse and completion of the greenhouse rainwater collection system, and 80 percent of the erection of the support building steel being completed. A summary of the latest status is included in the table below:

Facility ⁽¹⁾	Plan - Latest description presented on March 19, 2019	Current Status
Hamilton	Combined facilities: 166,000 sq. ft. capable of producing 17,500 kgs annually Timeline: Completion was expected by June 2019	<p><u>Revised Timeline:</u></p> <p>The Pharma Building has been completed and received Health Canada licence.</p> <p>The completion of the Greenhouse is expected in August 2019 and the Support building between September and October 2019.</p> <p>Financial and other considerations are specified below.</p>
Québec	<p>Combined Facilities: 1,310,000 sq. ft. capable of producing 185,000 kgs annually, in the following phases:</p> <ul style="list-style-type: none"> • Phase 1a Hybrid Greenhouse (1st floor): 578,000 sq. ft. - 65,000 kg capacity - Q4 2019 • Phase 1a Central Processing Facility (1st floor): 245,310 sq. ft. - Q4 2019 • Phase 1b 2nd floor Greenhouse: 197,518 sq. ft.; 65,000 kg capacity - 2020 • Phase 2 Hybrid Greenhouse: 289,000 sq. ft.; 55,000 kg - 2021 	<p>No changes to the stated plan are expected.</p> <p>Financial and other considerations are specified below.</p>

The next milestone that the Company intends to meet for each of the Hamilton Facility and the Québec Facility is the completion of the full construction of the structures for each facility. The estimated costs to achieve these milestones are \$7,646 for the Hamilton Facility and \$69,888 for Phase 1a of the Québec Facility, excluding operating and manufacturing equipment that may be purchased or leased. The Company will do a combination of in-house manufacturing and outsourcing based on factors such as available expertise, speed to market and cost. Costs incurred to date on the facilities build outs are included in Construction in Progress, within Property, Plant and Equipment and in Other assets in the Company's consolidated financial statements. The table below outlines the forecasted growing capacity at each of the Hamilton Facility and the Québec Facility and assumptions regarding construction timelines, facility size, and budget for structure construction:

Detail ⁽¹⁾	Hamilton Facility	Québec Facility
Project timelines	End Q3 2019	Q4 2019 to 2021
Annual Growing capacity	Approximately 17,500 kilograms	Approximately 185,000 kilograms
Square footage	166,000 square feet	1,310,000 square feet
Latest Construction budget	\$37,948	\$179,282 ⁽²⁾
Life-to-date spend as at June 30, 2019	\$30,302	\$67,288

With respect to the operating and manufacturing equipment, \$26,173 has been spent to date in Hamilton and \$85,658 in Quebec. Depending on the level of leasing and outsourcing undertaken, an additional \$16,282 could be incurred on equipment and systems to complete Hamilton in 2019. At Valleyfield, the equipment and systems will be phased in through 2021, which will be determined based on level of outsourced processing and manufacturing undertaken and potential changes in regulation, with an amount of \$47,475 subject to reduction due to outsourcing and leasing, forecasted for the balance of Phase 1a, of which \$19,275 is deferred to be spent through 2020. In addition, the Company expects to incur \$27,253 in accelerating Phase 1b in 2019 from 2020 subject to reduction of leasing and outsourcing undertaken.

⁽¹⁾ These statements constitute forward looking information related to possible events, conditions or financial performance based on future economic conditions and courses of action. These statements involve known and unknown risks, assumptions, uncertainties and other factors that may cause actual results or events to differ materially. The Company believes that there is a reasonable basis for the expectations reflected in the forward-looking statements, however, these expectations may not prove to be correct.

⁽²⁾ Includes \$42,106 estimate related to Phase 1b in 2020 and Phase 2 in 2021.

On July 19, 2018, the Hamilton City Council (the "City") voted to disallow the zoning amendment required in connection with the Hamilton Facility's planned greenhouse expansion contrary to the City's planning committee's recommendation. The Company reached a settlement with the City to allow the required zoning amendment on March 28, 2019 upon confirmation of the settlement by the LPAT, which was received on May 2, 2019.

Use of Proceeds from Previous Financings

The Company used funds from financings from prior years primarily for capital for its Hamilton and Québec Facilities, other capital expenditures, licensing transactions and development of start-up projects, operational expenses, and international expansion. No new financings occurred during the six months ended June 30, 2019 and the primary use of funds are as described in the above sections labelled "operating activities", "investing activities", and "financing activities". The spend on the Company's significant construction projects is also presented in the section entitled "Update on Hamilton Facility and Québec Facility Milestones". Sufficient funds are expected to be available to ensure that the Company can achieve its stated objectives. The Company is currently in discussions with a chartered Canadian bank to establish an operating loan secured on the Hamilton and Valleyfield facilities.

OFF-BALANCE SHEET ARRANGEMENTS

As at the date of this MD&A, the Company had no material off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the financial performance or financial condition of the Company.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

[a] Accounting policies currently in effect

Except as disclosed in Note 3 to our interim consolidated financial statements, there were no significant changes in our accounting policies and critical accounting estimates for the three and six months ended June 30, 2019 other than as described below. We describe our significant accounting policies and critical accounting estimates in Note 3 to the audited consolidated financial statements and MD&A for the year ended December 31, 2018.

[b] New standards, interpretations and amendments adopted by the Company

IFRS 16 – Leases (“IFRS 16”)

Effective January 1, 2019, the Company adopted IFRS 16, which supersedes previous accounting standards for leases, including IAS 17, Leases (“IAS 17”) and IFRIC 4, Determining whether an arrangement contains a lease (“IFRIC 4”).

IFRS 16 introduced a single accounting model for lessees unless the underlying asset is of low value or less than twelve months in duration. A lessee is required to recognize, on its statements of financial position, a right-of-use asset, representing its right to use the underlying lease asset, and a lease liability, representing its obligation to make lease payments. As a result of adopting IFRS 16, the Company has recognized an increase to both assets and liabilities on the consolidated statements of financial position, as well as a decrease to general and administrative expenses (for the removal of rent expense for leases), an increase to depreciation and amortization (due to depreciation of the right-of-use assets), and an increase to finance costs (due to accretion of the lease liability). The accounting treatment for lessors remains largely the same as under IAS 17.

The Company adopted IFRS 16 with the cumulative effect of initial application recognized as an adjustment to retained earnings within shareholders’ equity on January 1, 2019. The Company has not restated comparative figures for 2018. At transition, we applied the practical expedient available to us as lessee that allows us to maintain our lease assessments made under IAS 17 and IFRIC 4 for existing contracts. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed after January 1, 2019.

For leases that were classified as operating leases under IAS 17, lease liabilities at transition have been measured at the present value of remaining lease payments, discounted at the related incremental borrowing rate as at January 1, 2019, or if available, the interest rate implicit in the lease contract. Generally, right-of-use assets at transition have been measured at an amount equal to the corresponding lease liabilities, adjusted for any prepaid or accrued rent relating to that lease. For certain leases where the Company has readily available information, the Company has elected to measure the right-of-use assets at their carrying amounts as if IFRS 16 had been applied since the lease commencement date using the related incremental borrowing rate for the remaining lease period as at January 1, 2019.

On transition, the Company has elected to apply the recognition exemptions on short-term leases and low-value leases; however, the Company may choose to not elect the recognition exemptions on a class-by-class basis for new classes, and lease-by-lease basis, respectively, in the future. The Company does not currently have any contracts where it acts as the lessor.

Reconciliation of condensed consolidated statement of financial position as at January 1, 2019

Below is the effect of transition to IFRS 16 on the impacted line items of the Company’s interim condensed consolidated statement of financial position as at January 1, 2019:

	Reference	As reported as at December 31, 2018	Effect of IFRS 16 transition	Subsequent to transition as at January 1, 2019

Total Shareholders' Equity		\$ 413,695	\$ (40)	\$ 413,655
Total Liabilities and Shareholders' Equity		<u>\$ 445,957</u>	<u>\$ 1,279</u>	<u>\$ 447,236</u>

(i) Right-of-use assets and lease liabilities

The Company has recorded a right-of-use asset and a lease liability for all existing leases at the lease commencement date, which is January 1, 2019 for the purposes of adoption. The lease liability has been initially measured at the present value

of lease payments that remain to be paid at the commencement date. Lease payments included in the measurement of the lease liability include:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or rate;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

After transition, the right-of-use assets will initially be measured at cost, consisting of:

- the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date; plus
- any initial direct costs incurred; and
- an estimate of costs to dismantle and remove the underlying asset or restore the site on which it is located; less
- any lease incentives received.

The right-of-use assets will typically be depreciated on a straight-line basis over the lease term, unless the Company expects to obtain ownership of the leased asset at the end of the lease. The lease term will consist of:

- the non-cancellable period of the lease;
- periods covered by options to extend the lease, where we are reasonably certain to exercise the option; and
- periods covered by options to terminate the lease, where we are reasonably certain not to exercise the option.

The Company's weighted average borrowing rate applied to lease liabilities at January 1, 2019 is 2.99%. The difference between operating lease commitments disclosed as at December 31, 2018 under IAS 17 and discounted using the incremental borrowing rate at the date of initial application on January 1, 2019 and the lease liabilities recognized at the date of initial application is not significant.

[c] Change in functional currency of HemPoland

For the three and six months ended June 30, 2019, the functional currency of the Company's wholly owned subsidiary, HemPoland, was determined to be the European Euro, where it was previously the Polish Zloty. The Company determined there were no material impacts to the current period or prior periods' financial statements as a result of this change.

[d] New standards, interpretations and amendments not yet adopted by the Company.

The Company has not identified any relevant material new standards, interpretations and amendments to be adopted by the Company in future periods.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

[a] Fair values

The Company's financial instruments were comprised of the following as at June 30, 2019: cash and cash equivalents; restricted cash; refundable sales tax receivable; trade receivables; due from related parties; loan receivable; accounts payable and accrued liabilities; short-term loans; contingent consideration and lease liabilities.

The fair values of the financial assets and financial liabilities are shown at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The assumption for the instruments recorded at amortized costs that the instruments fair values approximate their carrying amounts is largely due to the short-term maturities of these instruments. The fair value of the loan receivable recorded at fair value through profit and loss is Level 3 and is based on the established underlying fair values of the assets during the recent transaction involving the investment in QuébecCo, whereby it was reasonably concluded to continue to approximate the same fair value as at June 30, 2019 as compared to the initial recognition date. The fair value of the loan receivable related to Califormulations recorded at fair value through profit and loss was also determined to be Level 3 and given the proximity to its initial recognition is still considered to approximate its fair value.

[b] Fair value hierarchy

Financial instruments recorded at fair value on the consolidated statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. During the three and six months ended June 30, 2019, there were no transfers of amounts between levels.

[c] Management of key risks arising from financial instruments

Credit Risk

As at June 30, 2019, the Company's trade receivables are almost entirely concentrated in Europe. The Company had one customer whose balance comprised 43% of total trade receivables as at June 30, 2019 (December 31, 2018 – two customers at 54% and 14%). The Company's revenues were derived primarily from the Company's operations in Europe from the Company's wholly owned subsidiary, HemPoland. The Company had one customer that accounted for 15% of total revenue earned during the three months ended June 30, 2019 (three months ended June 30, 2018 – none). For the six months ended June 30, 2019, the Company had two customers that accounted 12% and 10% of total revenue (six months ended June 30, 2018 – none).

RELATED PARTY TRANSACTIONS

Identification of related parties

Related parties for the period ending June 30, 2019 have been identified as follows:

Related party	Business relationship	Measurement basis
Jeffrey Scott	Director	Exchange amount
Nicholas Kirton	Director	Exchange amount
Marc Bertrand	Director	Exchange amount
Jacques Dessureault	Director	Exchange amount
Caroline MacCallum	Director	Exchange amount
Brian Athaide	Management, Director	Exchange amount
Sean Bovingdon	Management	Exchange amount
Michael Gibbons	Management	Exchange amount
Julia Golubovskaya	Management	Exchange amount
Marie-Josée LaFrance	Management	Exchange amount
David Perron	Management	Exchange amount
Csaba Reider	Management	Exchange amount
Geoffrey Riggs	Management	Exchange amount
Matthew Schmidt	Management	Exchange amount
Anna Stewart	Management	Exchange amount
John Wren	Management	Exchange amount
Shane Dungey	Management	Exchange amount
Ravinder Kumar	Management	Exchange amount
Marc Cernovitch	Management	Exchange amount
Nadine Jean-Francois	Management	Exchange amount
Robert Gora	Management	Exchange amount
Ian Wilms	Management, former Director	Exchange amount
Aurora Cannabis Inc.	10% security holder	Exchange amount
Epican and Epican Canada	Non-controlled investee	Exchange amount
9371-8633 Québec Inc.	Non-controlled investee	Exchange amount

Key transactions with related parties

There have been no material transactions with related parties and no unusual transactions outside of the normal course of business. As at June 30, 2019, the Company had no receivable or payable balances with key management personnel and \$103 of director fees payable.

Other

All shares of SpinCo were transferred to a third-party company pursuant to the terms of the Arrangement. The Company paid in the amount of \$200 were incurred on behalf of SpinCo, by the Company which were settled by the issue of warrants to the Company's shareholders of record. The Company is owed approximately \$145 as at June 30, 2019 for additional expenses paid on behalf of SpinCo.

REGULATORY LANDSCAPE

The results of operations and financial condition of the Company are subject to a number of regulations and are affected by a number of factors outside the control of management.

Canadian Regulatory Landscape

Cannabis production, distribution, sale, and use is illegal in Canada except where specifically permitted by law. Prior to October 17, 2018, the production, distribution, and use of cannabis for medical use was legal in Canada since 2001, first under the federal *Medical Marihuana Access Regulations*, later replaced with the *Marihuana for Medical Purposes Regulations*, and then the *Access to Cannabis for Medical Purposes Regulations* ("ACMPR"). On October 17, 2018, the federal Cannabis Act and accompanying Regulations, including the *Cannabis Regulations* ("Cannabis Regulations"), the new *Industrial Hemp Regulations* ("IHR", and together with the Cannabis Regulations, collectively, the "Regulations"), came into force, legalizing the production, distribution and sale of cannabis for adult recreational purposes, as well as incorporating the existing medical cannabis regulatory scheme under one complete framework. The Canadian federal government published regulations on June 13, 2019, amending the Cannabis Regulation by legalizing the sale of edible cannabis, cannabis extracts, and cannabis topicals in the Canadian market. The amendments come into force on October 17, 2019.

Pursuant to the federal regulatory framework in Canada, each province and territory may adopt its own laws governing the distribution, sale and consumption of cannabis and cannabis accessories within the province or territory. All Canadian provinces and territories have implemented or announced proposed mechanisms for the distribution and sale of cannabis for recreational purposes within those jurisdictions, and retail models vary between jurisdictions.

The Cannabis Act maintains separate access to cannabis for medical purposes, including providing that import and export licences and permits will only be issued in respect of cannabis for medical or scientific purposes or in respect of industrial hemp. Part 14 of the Cannabis Regulations sets out the regime for medical cannabis, which is substantively the same as the ACMPR with adjustments to create consistency with rules for non-medical use, improve patient access, and reduce the risk of abuse within the medical access system. Patients who have the authorization of their healthcare provider continue to have access to cannabis, either purchased directly from a federally licensed entity authorized to sell for medical purposes, or by registering to produce a limited amount of cannabis for their own medical purposes or designating someone to produce cannabis for them.

The Cannabis Act and the Cannabis Regulations provide a licensing scheme for the production, importation, exportation, testing, packaging, labelling, sending, delivery, transportation, sale, possession and disposal of cannabis for non-medicinal use (i.e., adult recreational use). Transitional provisions of the Cannabis Act provide that every licence issued under section 35 of the ACMPR that is in force immediately before the day on which the Cannabis Act comes into force is deemed to be a licence issued under the Cannabis Act, and that such licence will continue in force until it is revoked or expires.

Below are additional highlights of the Cannabis Act:

- Places restrictions on the amounts of cannabis that individuals can possess and distribute, and on public consumption and use, and prohibits the sale of cannabis unless authorized by the Cannabis Act.
- Permits individuals who are 18 years of age or older to cultivate, propagate, and harvest up to and including four cannabis plants in their dwelling-house, propagated from a seed or plant material authorized by the Cannabis Act.
- Restricts (but does not strictly prohibit) the promotion and display of cannabis, cannabis accessories and services related to cannabinoids to consumers, including restrictions on branding and a prohibition on false or misleading promotion and on sponsorships.
- Permits the informational promotion of cannabis by entities licensed to produce, sell or distribute cannabis in specified circumstances to individuals 18 years and older.
- Introduces packaging and labelling requirements for cannabis and cannabis accessories and prohibits the sale of cannabis or cannabis accessories that could be appealing to young persons.
- Provides the designated minister with the power to recall any cannabis or class of cannabis on reasonable grounds that such a recall is necessary to protect public health or public safety.
- Establishes a national cannabis tracking system to monitor the movement of cannabis from where it is grown, to where it is processed, to where it is sold.
- Provides powers to inspectors for the purpose of administering and enforcing the Cannabis Act and a system for administrative monetary penalties.

Provincial Regulatory Framework for Recreational Cannabis

While the Cannabis Act provides for the regulation of the commercial production of cannabis and related matters by the federal government, the Cannabis Act provides the provinces and territories of Canada with authority to adopt their own laws governing the distribution, sale and consumption of cannabis and cannabis accessory products within the province

or territory, permitting for example, provincial and territorial governments to set lower possession limit for individuals and higher age requirements. Currently each of the Canadian provincial and territorial jurisdictions has established a minimum age of 19 years old, except for Québec and Alberta, where the minimum age is 18.

All Canadian provinces and territories have implemented or announced proposed regulatory regimes for the distribution and sale of cannabis for recreational purposes within those jurisdictions. Provincial/territorial bodies act as intermediaries between entities licensed federally under the Cannabis Act and consumers, such bodies acting in some jurisdictions as exclusive cannabis wholesalers and distributors, and in some instances such bodies acting as exclusive retailers. The laws continue to evolve, and differences in provincial and territorial regulatory frameworks could result in, among other things, increased compliance costs, and increased supply costs.

Municipal and regional governments may also choose to impose additional requirements and regulations on the sale of recreational cannabis, adding further uncertainty and risk to the company's business. Municipal by-laws may restrict the number of recreational cannabis retail outlets that are permitted in a certain geographical area, or restrict the geographical locations wherein such retail outlets may be opened.

Regulatory Landscape Outside Canada

The Company only conducts business in jurisdictions outside of Canada where such operations are legally permissible in accordance with all of the laws of the foreign jurisdiction, the laws of Canada and its regulatory obligations to the TSX. The legal and regulatory requirements in the foreign countries in which the Company operates with respect to the cultivation and sale of cannabis, as well as local business culture and practices are different from those in Canada. Prior to commencing operations in a new country, in partnership with local legal counsel, consultants and partners, the Company conducts legal and commercial due diligence in order to ensure that the Company and its officers and directors gain a sufficient understanding of the legal, political and commercial framework and specific risks associated with operating in such jurisdiction. Where possible, the Company seeks to work with respected and experienced local partners who can help the Company to understand and navigate the local business and operating environment, language and cultural differences. In consultation with advisors, the Company takes steps deemed appropriate in light of the level of activity and investment it expects to have in each country to ensure the management of risks and the implementation of necessary internal controls.

Denmark

As of January 1, 2018, the Danish government initiated a trial permitting doctors to prescribe medical cannabis to a defined patient group. The trial ("pilot program") will continue for the next four years and is supported by federal funding. The Danish Medicines Agency issues licences to import "primary" (starter) cannabis products and to cultivate (as of July 1, 2018) and produce approved forms of medical cannabis for wholesale distribution within Denmark. Further to cannabis cultivation, the Danish government initiated a four-year development scheme so that the Danish Medicines Agency authorises research and development activities in terms of cultivating and handling cannabis, which may form part of the pilot programme at a later stage. All medical cannabis production facilities and products are subject to inspection by the Danish Medicines Agency. Regulations for the export of medical cannabis from Denmark have yet to be developed. Exporting activities relating to cannabis bulk or primary products must be in accordance with requirements laid down in the legislation, including obtaining the necessary authorisation, the country receiving the cannabis bulk must allow import of cannabis for medicinal use and the company importing the Cannabis Bulk or primary products must have the necessary authorisations in place according to national requirements in the importing country.

Jamaica

The Cannabis Licensing Authority (the "CLA") was established in Jamaica in 2015 under the *Dangerous Drugs Amendment Act*, with powers to make and oversee the implementation of regulations for licences, permits and other authorizations for the cultivation, processing, distribution, sale and transportation of cannabis for medicinal, scientific and therapeutic purposes. Currently the regulations do not generally allow for the import or export of medical cannabis, subject to obtaining an export permit. Medical cannabis is available to patients with a prescription written by a medical practitioner registered with the Medical Council of Jamaica. Licences, permits and other authorizations are required for the cultivation, processing, distribution, sale and transportation of medical cannabis. Licence applications are subjected to a rigorous review process and licencees are subject to pre- and post-licence inspection and reporting requirements. Once an applicant completes its post production building, the CLA inspects for final and full licence approval.

Poland

In Poland, the use of hemp is generally restricted and may be accepted only if certain statutory requirements are met. Polish laws provide specific regulations, depending on the use of the hemp. Pursuant to the *Misuse of Drugs Act*, hemp may be grown solely and exclusively for the needs of the textile, chemical, pulp and paper, food, cosmetic, pharmaceutical and construction industries, as well as for seed production. Buying hemp from a farmer requires a permit from the governor

of the province holding territorial jurisdiction over the plantation. Buying and reselling hemp seeds is subject to notification to the appropriate Provincial Inspector of Plant Health and Seed Inspection. Where hemp extracts are used for producing foodstuffs, the production facility must meet the sanitary requirements stipulated under the *Act on the Safety of Food and Nutrition*. The cultivation of cannabis which does not fall within the definition of hemp under the Misuse of Drugs Act, i.e. "plant species *Cannabis Sativa L.*, in which the total content of delta-9-tetrahydrocannabinidiol and tetrahydrocannabinolic acid (delta-9-THC-2-carboxylic acid) in the floral or fructifying tops of the plants, from which resins has not been removed, does not exceed 0.20% of the dry-extract content" is prohibited in Poland.

Mexico

On June 19, 2017, Mexico enacted laws allowing for the use of cannabis for medicinal purposes that can be prescribed by any licensed physician and sold in pharmacies, as long as the products contain less than 1% THC and the sale of other products with broad industrial uses as long as a cumulative dose of 1% THC is not exceeded, subject to provisions established in the implementing regulations to be issued by the executive branch. The authority overseeing medicinal cannabis regulations in Mexico is the Mexican Ministry of Health through the Federal Commission for the Protection against Sanitary Risks (COFEPRIS). On September 20, 2018, the Federal Commissioner of the COFEPRIS announced the conclusion of the technical review process for the regulation of medicinal cannabis and the proximate presentation of the regulations to the former Mexican President for ratification. Such ratification did not occur during the previous administration. On October 30, 2018, guidelines were issued by COFEPRIS regulating medicinal cannabis and allowing the sale of food, food supplements, alcoholic and non-alcoholic beverages without a medical prescription as long as a cumulative dose of 1% THC is not exceeded. Such guidelines were later revoked on March 27, 2019 and the Ministry of Health is currently working on new regulations which are expected to be published within the coming months. Management anticipates that regulations relating to medicinal cannabis and products containing less than 1% THC will be issued in the near future and exports to Mexico could begin sometime thereafter.

United States

"Marijuana" is a Schedule I controlled substance under the United States Controlled Substances Act of 1970. On December 20, 2018, hemp (defined as cannabis with less than 0.3% THC) was removed from Schedule 1 of the list of controlled substances under United States federal law in accordance with the United States Agriculture Improvement Act of 2018, commonly known as the "2018 Farm Bill". The 2018 Farm Bill does not affect any other cannabis product and therefore cannabis and cannabis derivatives that do not meet the definition of hemp, and activities involving them, remain illegal under United States federal law. In order to effectively implement the hemp-related provisions of the Farm Bill, the United States Department of Agriculture (the "USDA") must develop and approve a regulatory plan for the exercise of regulatory authority over hemp production in the United States. The USDA has not to date developed or approved such a plan. The Farm Bill also authorizes individual states to regulate hemp in their jurisdiction by developing and seeking USDA approval of a regulatory plan. In the absence of such approved plans, the production of hemp remains unlawful. In addition, notwithstanding the 2018 Farm Bill, the United States Food and Drug Administration (the "FDA") prohibits cannabis (including hemp) and its derivatives, including cannabidiol (CBD), for use as an ingredient in food and drink. The FDA held a public hearing on May 31, 2019, to obtain input from stakeholders regarding the regulation of products containing cannabis and cannabis derivatives. The FDA has not yet indicated whether its approach to the regulation of such products will change in light of the descheduling of hemp or other developments. In addition, any ingredient derived from hemp in food is subject to the premarket approval requirements applicable to food additives, unless that use is generally recognized as safe ("GRAS"). The FDA recently announced the issuance of letters of no objection to three GRAS notices for ingredients derived from hemp seed that contain trace amounts of THC and CBD but has not to date addressed whether hemp-derived THC, CBD or other cannabinoids in non-trace levels are GRAS.

RISK FACTORS AND UNCERTAINTIES

Many factors could cause the Company's results of operations, performance and financial condition to differ materially from those expressed or implied by the forward-looking statements and forward-looking information contained in this management's analysis and discussion, including the following factors, which are discussed in greater detail under the heading "Risk Factors" in the Company's Annual Information Form March 19, 2019 filed with securities regulators and available on www.sedar.com, which risk factors are incorporated by reference into this document and should be reviewed in detail by all readers:

- the Company has a limited operating history;
- the Company may be unable to sustain its revenue growth and development;
- there are factors which may prevent the Company from the realization of growth targets;
- the Company's actual financial position and results of operations may differ materially from the expectations of the Company's management;
- the Company expects to incur significant ongoing costs and obligations related to its investment in infrastructure, growth, research and development, regulatory compliance and operations;
- there is no assurance that the Company will turn a profit or generate immediate revenues;
- the adult-use cannabis market in Canada is a relatively new industry;

- the adult-use cannabis market in Canada may experience supply and demand fluctuations that could result in revenue and price decreases;
- the cannabis market in Canada may be significantly reduced over time due to personal cultivation;
- the size of the Company's target market is difficult to quantify, and investors will be reliant on their own estimates on the accuracy of market data;
- the Company is subject to changes in laws, regulations and guidelines which could adversely affect the Company's future business, financial condition and results of operations;
- the Company is reliant on regulatory approvals and cultivation Licenses for its ability to grow, process, package, store and sell cannabis and other products derived therefrom, and these regulatory approvals are subject to ongoing compliance requirements, reporting obligations and fixed terms requiring renewal;
- any failure on the Company's part to comply with applicable regulations could prevent it from being able to carry on its business and there may be additional costs associated with any such failure;
- under Canadian regulations, a Licensed Producer of cannabis is restricted regarding the type and form of marketing it can undertake which could materially impact sales performance;
- the Company intends to target a premium segment of the adult-use cannabis market, which may not materialize, or in which it may not be able to develop or maintain a brand that attracts or retains customers;
- the Company's industry is experiencing rapid growth and consolidation that may cause the Company to lose key relationships and intensify competition;
- the Company may be unsuccessful in competing in the overall legal adult-use cannabis market in Canada and any other countries it intends to operate in;
- the Company, or the cannabis industry more generally, may receive unfavorable publicity or become subject to negative consumer or investor perception;
- the Hamilton Facility and the Québec Facility are under construction and any delay in construction may have an adverse impact on the Company;
- the Hamilton Facility and the Québec Facility are expected to become integral to the Company's business and operations;
- there can be no assurance that the Company will receive the required approvals with respect to the Québec Facility;
- the Company may not be able to develop its products, which could prevent it from ever becoming profitable;
- if the Company is unable to develop and market new products, such as beverages, it may not be able to keep pace with market developments;
- there has been limited study on the health effects of cannabis products, including CBD, and future clinical research studies may lead to conclusions that dispute or conflict with the Company's understanding and belief regarding the medical benefits, viability, safety, efficacy, dosing and social acceptance of such products;
- trade of cannabis for non-medicinal purposes within Canada may be restricted by the Canadian Free Trade Agreement;
- the Company is exposed to risks relating to the laws of various countries as a result of its planned international operations;
- the Company's business is subject to a variety of foreign laws, many of which are unsettled and still developing, and which could subject it to claims or otherwise harm its business;
- the Company must rely on international advisors and consultants in the foreign countries in which it intends to operate;
- the Company is required to comply concurrently with federal, state or provincial, and local laws in each jurisdiction where it operates or to which it exports its products;
- the hemp and CBD industries and markets are new and heavily regulated with rules subject to rapidly changing laws and uncertainty, compliance with which may come with significant cost;
- the hemp and CBD products industries and markets in Canada, the EU, Jamaica and Mexico are also subject to many of the same risks as the adult-use cannabis industry and market;
- if the Company is unable to attract and retain key personnel, it may not be able to compete effectively in the cannabis market;
- the Company has entered into and in the future may seek to enter into strategic alliances including contractual relationships, joint ventures, selective acquisitions, licensing arrangements or other relationships, or expand the scope of currently existing relationships, with third parties that the Company believes will have a beneficial impact, and there are risks that such strategic alliances or expansions of the Company's currently existing relationships may not enhance its business in the desired manner;
- the Company may not be able to successfully identify and execute future acquisitions or dispositions or successfully manage the impacts of such transactions on its operations;
- the cultivation of cannabis includes risks inherent in an agricultural business including the risk of crop loss, sudden changes in environmental conditions, equipment failure, product recalls and others;
- the Company is reliant on key inputs, such as water and utilities, and any interruption of these services could have a material adverse effect on the Company's finances and operation results. The Company is also dependent on access to skilled labour, equipment and parts;
- the Company is vulnerable to rising energy costs;
- the Company's products may not have, or may not be perceived to have, the effects intended by the end user;
- the Company's quality control systems may not operate effectively;
- the Company's cannabis products may be subject to recalls for a variety of reasons, which could require it to expend significant management and capital resources;
- the Company faces an inherent risk of exposure to product liability;

- the Company may be subject to liability claims as a result of positive testing for THC or banned substances;
- consumer preferences may change, and the Company may be unsuccessful in retaining customers;
- the Company's operations are subject to safety, health and environmental laws and regulations applicable to its operations and industry in the various jurisdictions in which it operates, and it may be held liable for any breaches of those laws and regulations;
- the Company could be liable for fraudulent or illegal activity by its employees, contractors and consultants resulting in significant financial losses or claims against the Company;
- the Company may become subject to litigation in the ordinary course of business;
- the Company will be reliant on information technology systems and may be subject to damaging cyber-attacks;
- the Company may be exposed to liability or the threat of liability in relation to the use of customer information and other personal and confidential information;
- the Company may be subject to risks related to the protection and enforcement of its intellectual property rights, or intellectual property it licenses from others, and may become subject to allegations that it or its licensors are in violation of intellectual property rights of third parties;
- the Company may be subject to breaches of security at its facilities;
- the Company may incur additional indebtedness;
- the Company may not be able to secure adequate or reliable sources of funding required to operate its business or increase its production to meet consumer demand for its products;
- management may not be able to successfully implement adequate internal controls over financial reporting;
- the Company has negative operating cash flow;
- the Company may be subject to credit risk;
- the Company's loans may contain covenants that limit its ability to seek additional financing or perform desired business operations;
- tax and accounting requirements may change in ways that are unforeseen to the Company and it may face difficulty or be unable to implement or comply with any such changes;
- fluctuations in foreign currency exchange rates could harm the Company's results of operations;
- if the Company has a material weakness in its internal controls over financial reporting, investors could lose confidence in the reliability of the Company's financial statements, which could result in a decrease in the value of its securities;
- it is anticipated that no cash dividends will be paid to holders of Common Shares for the foreseeable future;
- the Company continues to sell shares for cash to fund operations, expansion, and mergers and acquisitions that will dilute the current shareholders;
- the Company's officers and directors control a large percentage of the Company's issued and outstanding Common Shares and such officers and directors may have the ability to control matters affecting the Company and its business;
- the price of the Common Shares in public markets may experience significant fluctuations;
- if securities or industry analysts do not continue to publish research, or publish inaccurate or unfavourable research, about the Company's business, the Common Share price and trading volume could decline; and
- U.S. border officials could deny entry into the U.S. to employees of or investors with cannabis operations in the United States and Canada.

DISCLOSURE CONTROLS AND PROCEDURES

Management is responsible for establishing and maintaining a system of disclosure controls and procedures (“DC&P”) under National Instrument 52-109 to provide reasonable assurance that all material information relating to the Company and its subsidiaries is gathered and reported to senior management on a timely basis so that appropriate decisions can be made regarding public disclosure.

The Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) have designed such disclosure controls and procedures, or caused them to be designed under their supervision, to provide reasonable assurance that material information relating to the Company, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the disclosures are being prepared to provide reasonable assurance that information required to be disclosed under securities legislation is recorded, processed, summarized and reported within the time periods specified in the securities legislation.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is also responsible for establishing and maintaining adequate internal control over financial reporting (“ICFR”) to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial reports for external purposes in accordance with IFRS.

The CEO and CFO have designed internal control over financial reporting, or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with IFRS as at June 30, 2019.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no material changes in the Company’s internal control over financial reporting that occurred during the three and six months ended June 30, 2019, which have materially affected, or are reasonably likely to affect, the Company’s internal controls over financial reporting.

LIMITATIONS ON SCOPE AND DESIGN

In accordance with National Instrument 52-109 subsection (3), the CEO and CFO may limit the certification to exclude a business that the issuer acquired not more than 365 days before the end of the financial period in question. Therefore, the CEO and CFO have limited the scope of the design of the Company’s DC&P and ICFR to exclude HemPoland and its subsidiaries, acquired on October 1, 2018, for the three and six months ended June 30, 2019 and comparative period ending on December 31, 2018. HemPoland’s total assets accounted for approximately 8% of the Company’s total assets and HemPoland’s total liabilities accounted for approximately 15% of the Company’s total liabilities. Substantially all the Company’s revenues were derived from HemPoland and less than 1% of the Company’s net loss was attributable to HemPoland.

OUTSTANDING SHARE DATA

As of the date of this MD&A, the Company had the following securities issued and outstanding:

Shares	275,500,388
Warrants	64,244,730
Special underwriter's warrants	234,600
Compensation options	517,587
Escrowed share units arising from the HemPoland transaction	1,968,323
Contingent share units arising from the HemPoland transaction	3,047,723
Restricted share units issued to employees	54,348
Convertible share units	74,074
Stock options	16,901,800

See the Company’s consolidated financial statements for a detailed description of these securities.
